PROFESSIONAL SUMMARY

Cybersecurity professional with 6+ years of experience in Security Operations (SOC L1/L2), specializing in threat detection, incident response, and endpoint security across enterprise environments. Hands-on expertise in Microsoft Defender suite, Microsoft Sentinel (SIEM), and Trend Micro Vision One/Cloud One (XDR).

Proven ability to monitor, triage, and respond to real-time security incidents across on-premises and cloud (Azure/AWS/GCP) environments. Strong background in malware analysis, email security, threat hunting, and SIEM/EDR integrations, with a focus on reducing false positives and improving response efficiency.

WORK EXPERIENCE

Senior Associate – Cybersecurity Defence (EDR/XDR SOC Analyst)

Kyndryl Pvt Ltd | Jan 2019 – Present

- Led SOC L1/L2 security operations for global clients across on-prem and cloud environments.
- Monitored, triaged, and investigated security alerts and incidents using Microsoft Defender and SIEM platforms.
- Worked extensively with Microsoft Defender (Endpoint, Identity, Office 365, Cloud Apps) for threat detection and automated response.
- Utilized Microsoft Sentinel for log analysis, incident investigation, and threat hunting using KQL queries.
- Integrated and managed data connectors in Sentinel for real-time ingestion from endpoints, cloud services, and network devices.
- Administered Trend Micro Vision One (XDR) for cross-layer threat detection across endpoints, email, and servers.
- Managed Trend Micro Cloud One for cloud workload protection and compliance monitoring.
- Investigated endpoint security incidents, including malware infections, suspicious processes, and lateral movement attempts.
- Performed malware analysis (static & behavioural) to identify IOCs and attack patterns.

- Handled email security incidents, including phishing, spoofing, and malicious attachments.
- Conducted proactive threat hunting using SIEM queries, behavioural analytics, and threat intelligence.
- Developed and fine-tuned detection rules and use cases, reducing false positives and improving alert quality.
- Responded to incidents by isolating endpoints, blocking malicious IPs/domains, and coordinating remediation.
- Implemented real-time alerting and automated response mechanisms across EDR/XDR platforms.
- Managed security across 5000+ endpoints and servers, implementing ransomware, malware, and C2 detection controls.
- Led SOC setup and onboarding, delivering full security coverage (endpoint, cloud, email, network) within 30 days.
- Migrated clients from on-prem SOC to SaaS-based security models, improving scalability and automation.
- Conducted vulnerability assessments using Qualys and supported patch management cycles.
- Generated risk reports, dashboards, and incident summaries for stakeholders and leadership teams.
- Acted as SPOC between business and cybersecurity teams for incident handling and risk communication.

Key Achievements:

- Reduced false positives by 35% through SIEM/XDR rule tuning
- Improved MTTR by 40% by establishing a fully functional SOC within 30 days
- Designed API-based integrations for Azure/AWS cloud security visibility

IAM Security Analyst – Secondary Controls

IBM India Pvt Ltd | Nov 2016 – Jan 2019

- Managed identity and access management (IAM) operations across multiple enterprise accounts
- Ensured compliance with access control policies and audit requirements
- Performed user provisioning, de-provisioning, and access reviews using ISIM and related tools
- Worked with ServiceNow and OpenPages for ticketing, audit tracking, and issue resolution
- Conducted audit readiness activities, maintaining 100% compliance across multiple audits

- Collaborated with cross-functional teams to resolve access issues and improve processes
 - Maintained secure storage of audit artifacts and documentation
-

IAM Security Analyst – Primary Controls

IBM India Pvt Ltd | Sep 2014 – Nov 2016

- Managed user accounts, groups, mailboxes, and access controls in Active Directory and ISIM
 - Supported identity lifecycle management including creation, modification, and deletion
 - Performed data migrations and access restructuring across regions
 - Worked with ticketing systems (Remedy, ServiceNow) to resolve access requests and incidents
 - Conducted audit checks, RCA, and reporting to ensure compliance and operational efficiency
 - Improved team performance through process optimization and quality checks
-

TECHNICAL SKILLS

- SIEM & Monitoring: Microsoft Sentinel, Splunk
 - EDR/XDR: Microsoft Defender, Trend Micro Vision One, Trend Micro Cloud One
 - Security Domains: Endpoint Security, Email Security, Threat Hunting, Incident Response
 - Cloud Security: Azure, AWS (Security Monitoring & Integration)
 - Vulnerability Management: Qualys
 - IAM Tools: ISIM, Active Directory
 - Ticketing Tools: ServiceNow, Remedy
 - Query Languages: KQL (Kusto Query Language)
-

EDUCATION

Bachelor of Computer Applications from Sikkim Manipal University in 2014

Currently pursuing MSc in Cybersecurity at REVA University.
